

E510

TECO   **Westinghouse**

E510

Compact Drive

IP 20/ NEMA 1
0.5-40 HP (230V)
1-75 HP (460V)

Control Mode Application & Selection Guide

The E510 compact AC Drive is an easily configurable product that controls many motor driven applications. Compact size is convenient for retrofitting or replacing an older generation VFD. From simple fixed speed set ups through applications with permanent magnet motors, the E510 can meet your process and machine requirements. Typical market and application solutions are listed below:

- Conveyors
- Mixing equipment
- Fans and blowers
- Pumps
- Lathes
- AC contactor replacement

FEATURES & HIGHLIGHTS

- Power Range:
 - 230V, 1Ø/ 3Ø (0.5 to 3 HP)
 - 230V, 3Ø (5 to 40 HP)
 - 460V, 3Ø (1 to 75 HP)
- Parameters grouped by function
- Built-in PLC functionality
- PID process control loop
 - Sleep mode
 - 0-10VDC or 4-20mA feedback
 - Loss of feedback or tracking detection
- Built-in Modbus Protocol (RJ45 Interface)
- 5 Digit operator's keypad with speed pot
 - Scalable display
 - Programming parameters
 - Diagnostics monitoring
- Digital and analog inputs and outputs have extremely fast (~4 msec) update time
- Auto run mode (cyclic operation)
- Power loss ride through
- Automatic Voltage Regulation (AVR)
 - Stabilizes output voltage against fluctuating input voltage

I/O FEATURES

Digital Inputs	<ul style="list-style-type: none"> • Qty 6 configurable • Over 39 available selections • Assign each as normally open or normally closed • 24V power supply • Pulse input
Digital Outputs	<ul style="list-style-type: none"> • Qty 2 relay outputs • Over 20 available selections • Assign each as normally open or normally closed
Analog Inputs	<ul style="list-style-type: none"> • Qty 2 analog input channels: Select either @0-10VDC or 4-20mA • Adjustable gain and bias on each channel • Speed reference or PID feedback
Analog Output	<ul style="list-style-type: none"> • 0-10VDC • 5 available configurations <ul style="list-style-type: none"> - Output Frequency - Set Frequency - Output Current - Output Voltage - DC Bus Voltage • Adjustable gain and bias
Safety Input	Dedicated safety input (factory jumpered)
RS485	Select Modbus RTU or BACNet

Integral Intelligent LED Keypad

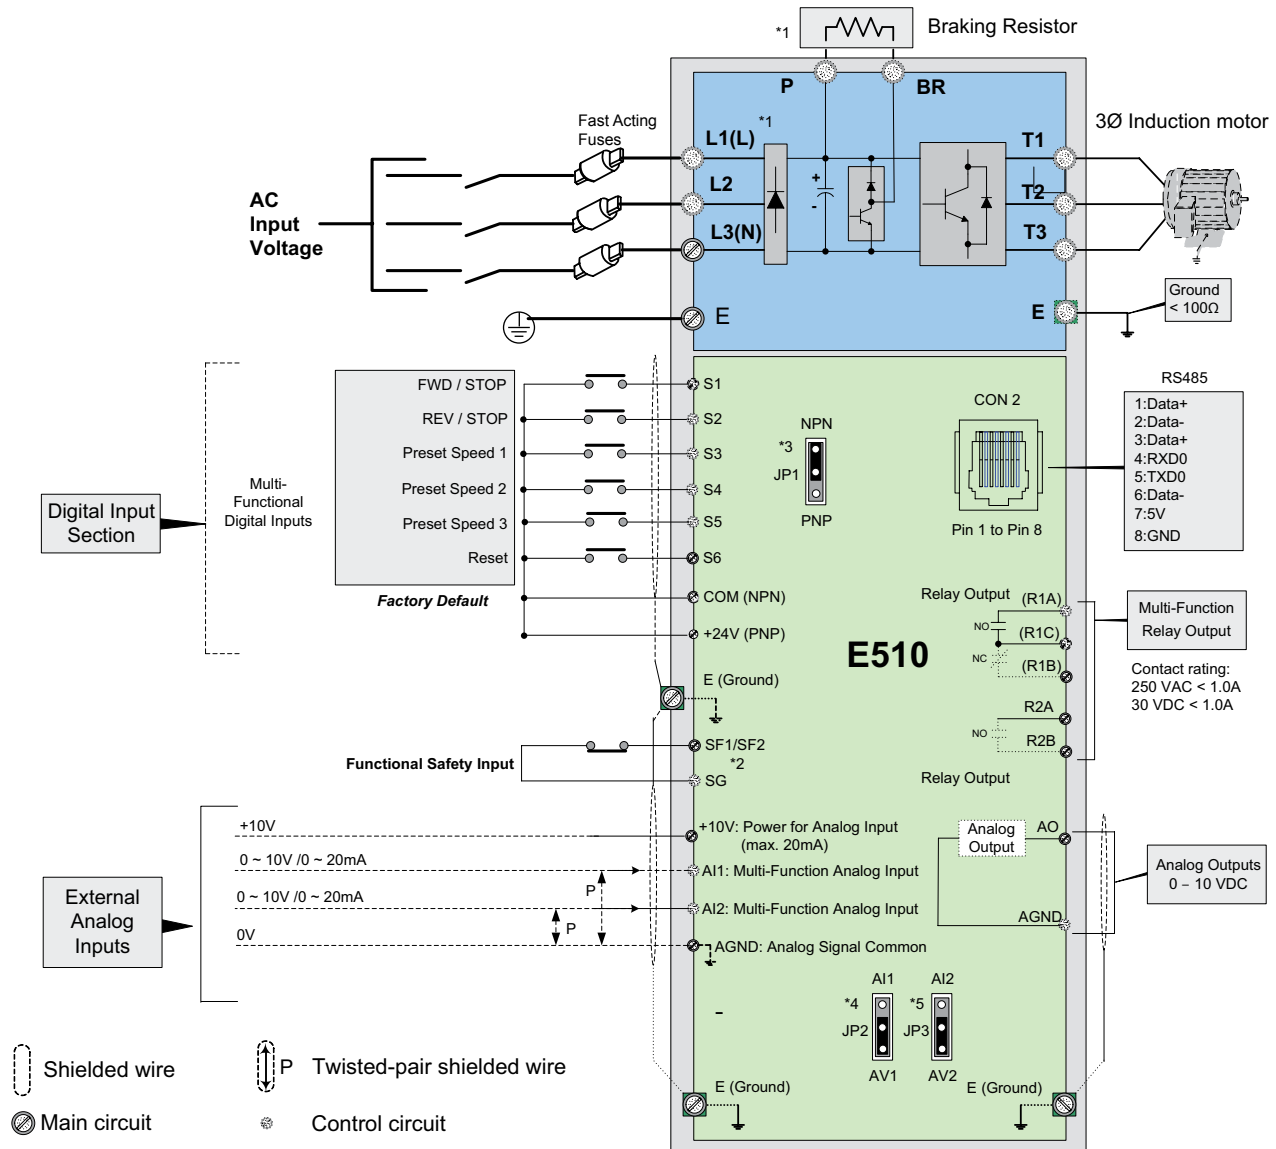

SPECIFICATIONS	
Control Mode	V/Hz, Sensorless Vector (SLV), Permanent Magnet Sensorless Vector (PMSLV)
Frequency Range	0-599Hz
Frequency Accuracy	Digital Input: .01Hz Analog input: 0.1%
Speed Control	50:1
Starting Torque	150%/1Hz (SLV) 150%/3Hz (V/Hz)
Overload Tolerance (Rated Output Current)	150%/1 minute 120%/1 minute Frames 5/6
Frequency Settings	<ul style="list-style-type: none"> • Frequency setting with \wedge, \vee keys • Potentiometer on keypad • External input terminals <ul style="list-style-type: none"> - 0-10VDC or - 4-20mA • Multi-function Input <ul style="list-style-type: none"> • (Up/Down) • Pulse input
Acceleration Settings	<ul style="list-style-type: none"> • Two sets of acceleration and deceleration times (0-3600 sec) • Jog acceleration and deceleration settings
Voltage/Frequency Characteristics	<ul style="list-style-type: none"> • Qty 18 preset V/Hz patterns plus user settable V/F pattern • Adjustable voltage (torque) boost
Control Features	<ul style="list-style-type: none"> • 1-16kHz Carrier frequency (adjustable) • Start into rotating load • Acceleration/Deceleration ramps with S curves • Sensorless Vector mode with auto tuning • PM control mode • DC injection braking • PID loop control
Input Voltage Range	200-240VAC +10%, -15% 380-480VAC +10%, -15%

PROTECTION FEATURES	
Overload Stall Prevention	Up to 150%, 1 minute on acceleration, deceleration and constant speed
Overcurrent	Instantaneous above 200%
DC BUS Overvoltage	230V input: >410VDC 460V input: >810VDC
DC BUS Undervoltage	230V input: <190 VDC 460V input: <380 VDC
Other protection	Ground Fault, Phase Loss, Overtemperature, Loss of PID Feedback External Fault Setting, Fire Mode

ENVIRONMENTAL FEATURES	
Operating Temperature	-10~+50°C
Storage Temperature	-20~+70°C
Humidity	95% RH or less (non-condensing)
Vibration/ Shock	<ul style="list-style-type: none"> • 20 HP or less; 1g (32.2 ft/sec²) • 20-25 HP; 0.6g (19.3 ft/sec²)
Certification	Complies with IEC 60018-2-78, UL, cUL, CE, & RoHS

Connection Diagram

Notes:

- *1: The 230V, 0.5-25 HP and 460V, 1-40 HP have a built-in braking transistor. The braking resistor can be connected between P and BR.
- *2: Run Permissive input SF and SG is a normally closed input. This input must be closed to enable the inverter output. A jumper is factory installed. Remove the jumper when installing user-defined interlocks and permissives.
- *3: Use jumper JP1 to select between Sink (NPN, with 24VG common) or Source (PNP, with +24V common) for multi-function digital input terminals S1~S6.
- *4: Use jumper JP2 to switch between voltage and current input for Multi-function analog input 1 (AI1).
- *5: Use jumper JP3 to switch between voltage and current input for Multi-function analog input 1 (AI2).

Control Circuit Terminal Description

TYPE	TERMINAL	TERMINAL FUNCTION		SIGNAL LEVEL
Digital Input Signals	S1	Please see "Digital Input Section" on "Connection Diagram" page (left) for default settings and setting range.		24 VDC, 8 mA photocoupler isolation. (The max. input voltage is 30 Vdc, input resistance is 4.3kΩ) High Logic: 13V Low Logic: 10V
	S2			
	S3			
	S4			
	S5			
	S6			
Relay Outputs	R1A	NO (Normally Open)	Please see "Digital Input Section" on "Connection Diagram" page (left) for default settings and setting range.	250VAC/1A (30VDC/1A)
	R1B	NC (Normally Closed)		
	R1C	Common Point		
	R2A	NO (Normally Open)		
	R2B			
24Vdc Supply	COM	Common point of PNP input (JP1 switch to PNP)		±15%, Max output current 60mA
	24V	Common point of NPN input (JP1 switch to NPN)		
Analog Input Signals	10V	Built-in power for external potentiometer		10V (Max current: 20mA)
	AI1/AV1	Multi-analog input 1 (0-10V/0-20mA) (Please use JP2 to select voltage or current input)		Resistance for voltage input is 153KΩ; for current input is 500Ω
	AI2/AV2	Multi-analog input 2 (0-10V/0-20mA) (Please use JP3 to select voltage or current input)		
	AGND	Analog input common point		—
Ground		Ground terminal		—
Analog Output Signal	AO	Analog output terminal		0~10VDC, (Max current: 2mA)
	AGND	Analog input common point		—
Safety Switch	SF1	Safety switch, the output voltage of inverter will be cut off when the terminal switches on.		—
	SG			

Control Circuit Terminal

R2A	R2B	R1A	R1B	R1C	*	S1	S3	S5	24V	AI1	AI2
S(+)	S(-)	SF1	SG	*	COM	S2	S4	S6	AGND	10V	AO

*Terminals used for European standard drive.

Terminal sizes are standard; no special micro tools are needed for making connections.

Models & Ratings

All Models Have Remote Mountable Keypad with a Potentiometer.

230V 1/3-Phase Input/ 3-Phase Output

MODEL NO.	HP		OUTPUT AMPS		DIMENSIONS (Inches)			APPROX. WT. (lbs.)
	CONSTANT TORQUE	VARIABLE TORQUE	CONSTANT TORQUE	VARIABLE TORQUE	HEIGHT	WIDTH	DEPTH	
E510-2P5-H-U	0.5	0.5	3.1	3.1	7.43	3.57	5.96	3.5
E510-201-H-U	1	1	4.5	4.5	7.43	3.57	5.96	3.5

Options & Accessories

Expansion cables and bezel kit for remote mounting of operator's keypad

JN5-CM-01M	1m cable
JN5-CM-02M	2m cable
JN5-CM-03M	3m cable
JN5-CM-05M	5m cable
JN5-KEYBOX	Remote keypad holder

The E510 has a standard RS485 port with RTU Modbus protocol. A cable that connects this port to a USB compatible device is available.

JN5-CM-USB	USB cable to connect PC
------------	-------------------------

The E510 has a standard LED Keypad. An optional LCD keypad or copy module for upload/download are available.

JN5-OP-A02	IP20 LCD operator
JN5-CU	Copy unit

NEMA1 kit replacements are available to upgrade the protection level of inverter. It can be installed at the bottom of the inverter. (Units come with NEMA 1 conduit kits as shipped.)

JN5-NK-E01	NEMA 1 Kit for frame 1
JN5-NK-E02	NEMA 1 Kit for frame 2
JN5-NK-E03	NEMA 1 Kit for frame 3
JN5-NK-E04	NEMA 1 Kit for frame 4

Dust Stickers can upgrade the protection level to avoid the entry of foreign matter. (When an inverter is installed with a dust sticker, do not exceed the 70% rated current of the inverter.)

JN5-ECOV1*	Dust Sticker for frame 1
JN5-ECOV2*	Dust Sticker for frame 2
JN5-ECOV3*	Dust Sticker for frame 3
JN5-ECOV4*	Dust Sticker for frame 4

*NEMA1 kits and Dust Stickers are included with the frames 1-4 VFDs. These parts are intended as replacement items.

TECO-Westinghouse Motor Company offers an extensive line of Variable Speed Drives and Soft Starters for your motor control applications.

We also offer a wide variety of motors that are matched with the Drives and Soft Starters including Vertical Hollow Shaft, Rolled Steel, and NEMA Premium Efficient motors.

From “in stock” controls to engineered systems, we can provide you the right control solution including an extensive line of TECO-Westinghouse AC Motors.
